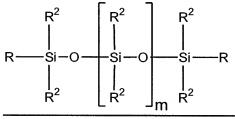
AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

Claim 1 (Currently Amended) A process for reducing or eliminating the transfer or migration of a cosmetic, hygiene or pharmaceutical composition, said process comprising introducing into said composition an emulsion comprising at least one α,ω-substituted oxyalklyenated silicone in an amount effective for reducing or eliminating the transfer or migration of said composition, with the proviso that said emulsion does not contain clay,

wherein said α,ω-substituted oxyalkylenated silicone corresponds to formula (I) below:



(I)

in which: R = $-(CH_2)_pO-(C_2H_4O)_x(C_3H_6O)_yR^1$

where:

- R^1 represents H, CH_3 or CH_2CH_3,

- p is an integer ranging from 1 to 5, x ranges from 1 to 100 and y ranges from 0 to 50,

- the units (C_2H_4O) and (C_3H_6O) being distributed randomly or in blocks,

- the radicals R^2 independently represent a C_1-C_3 alkyl radical or a phenyl radical,

- $5 \leq m \leq 300$.

Claim 2 (Canceled).

Claim 3 (Canceled).

Claim 4 (Currently Amended) The process according to claim ~~3~~1, wherein said R^2 radicals are all methyl radicals and:

- p ranges from 2 to 4,

- x ranges from 3 to 100,

- m ranges from 50 to 200.

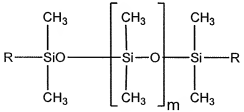
Claim 5 (Currently Amended) The process according to claim ~~3~~1, wherein the average molecular weight of R ranges from 800 to 2600.

Claim 6 (Currently Amended) The process according to claim ~~3~~1, wherein the weight ratio of the C_2H_6O units ranges from 100:10 to 20:80.

Claim 7 (Original) The process according to claim 6, wherein said weight ratio is about 42/58.

Claim 8 (Currently Amended) The process according to claim ~~3~~1, wherein R^1 is a methyl group.

Claim 9 (Original) The process according to claim 1, wherein said α,ω-substituted oxyalkylenated silicone corresponds to the following formula:



in which:

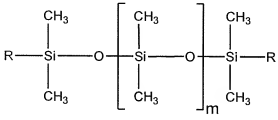
- m = 100,

- R = $(CH_2)_3$-O-$(C_2H_4O)_x$-$(C_3H_6O)_y$-CH_3, where x ranges from 3 to 100 and y ranges from 1 to 50, the weight ratio of the number of C_2H_4O units to the number of C_3H_6O units to the number of C_3H_6O units being about 42/58, the average molecular weight of R ranging from 800 to 1000.

Claim 10 (Original) The process according to claim 1, where said α,ω-substituted oxyalkylenated silicone is present in the composition in a proportion ranging from 0.1 to 30%, by weight relative to the total weight of the composition.

Claim 11 (Original) The process according to claim 10, wherein said α,ω-substituted oxyalkylenated silicone is present in the composition in a proportion ranging from 0.5 to 10%.

Claim 12 (Original) A water-in-oil emulsion comprising an aqueous phase and a fatty phase comprising at least one silicone oil, said emulsion further comprising at least one dyestuff and at least one α,ω-substituted oxyalkylenated silicone of the following formula:



in which:

- m = 100,

- R = $(CH_2)_3$-O-$(C_2H_4O)_x$-$(C_3H_6O)_y$-CH_3, where x ranges from 3 to 100 and y ranges from 1 to 50, the weight ratio of the number of C_2H_4O units to the number of

C_3H_6O units being about 42/58, the average molecular weight of R ranging from 800 to 1000.

Claim 13 (Original) The emulsion according to claim 12, wherein said at least one oxyalkylenated silicone is present in the emulsion in a proportion ranging from 0.1 to 30% by weight relative to the total weight of the emulsion.

Claim 14 (Original) The emulsion according to claim 13, wherein said at least one oxyalkylenated silicone is present in the emulsion in a proportion ranging from 0.5 to 10%.

Claim 15 (Original) The emulsion according to claim 12, wherein said at least one dyestuff is chosen from inorganic and organic pigments, lakes and dyes which are soluble in aqueous or organic media.

Claim 16 (Previously Presented) The emulsion according to claim 15, wherein said pigments are chosen from titanium dioxide, zirconium dioxide, cerium dioxide, zinc oxide, iron oxide, chromium oxide, ferric blue, pearlescent agents, coloured titanium mica, carbon black, barium, strontium, calcium and aluminum lakes, pigments coated with at least one silicone compound, and pigments coated with polymers.

Claim 17 (Original) The emulsion according to claim 16 wherein said pearlescent agents are selected from mica coated with titanium oxide, mica coated with iron oxide, mica coated with natural pigment and mica coated with bismuth oxychloride, and further wherein said polymers are selected from polyethylenes and amino acids.

Claim 18 (Previously Presented) The emulsion according to claim 16, wherein said at least one pigment is present in the emulsion in a proportion ranging from greater than 0% to 20%, by weight relative to the total weight of the emulsion.

Claim 19 (Original) The emulsion according to claim 18, wherein said at least one pigment is present in a proportion ranging from 2 to 15%.

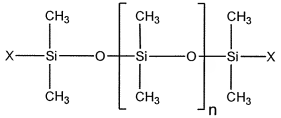
Claim 20 (Original) The emulsion according to claim 15, wherein said at least one dye is chosen from the disodium salt of ponceau, the disodium salt of alizarin green, quinoline yellow, the trisodium salt of amaranth, the disodium salt of tartrazine, the monosodium salt of rhodamine, the disodium salt of fuchsin, and xanthopyll.

Claim 21 (Previously Presented) The emulsion according to claim 20, wherein said at least one dye is present in the emulsion in a proportion ranging from greater than 0 to 15%, by weight relative to the total weight of the emulsion.

Claim 22 (Original) The emulsion according to claim 21, wherein said at least one dye is present in the emulsion in a proportion ranging from 8 to 12%.

Claim 23 (Previously Presented) The emulsion according to claim 12, wherein said at least one silicone oil is chosen from linear and cyclic polydiorganosiloxanes and optionally crosslinked organopolysiloxanes.

Claim 24 (Previously Presented) The emulsion according to claim 23, wherein said linear polydiorganosiloxanes correspond to the following formula:

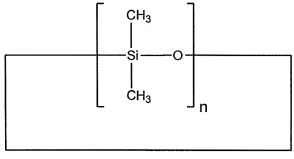


in which:

- x is $-CH_3$ or OH, and

- n is an integer ranging from 0 to 2000.

Claim 25 (Previously Presented) The emulsion according to claim 23, wherein said cyclic polydiorganosiloxanes are selected from cyclomethicones and mixtures of cyclomethicones corresponding to the following formula:



in which:

- n is an integer from 3 to 8.

Claim 26 (Original) The emulsion according to claim 25, wherein said cyclomethicones are chosen from cyclotetradimethylsiloxane (n=4), cyclopentadimethylsiloxane (n=5) and cyclohexadimethylsiloxane (n=6).

Claim 27 (Previously Presented) The emulsion according to claim 23, wherein said at least one silicone oil is chosen from cyclic polydiorganosiloxanes.

Claim 28 (Original) The emulsion according to claim 12, wherein said at least one silicone oil is present in a proportion of at least 5%, by weight relative to the total weight of the composition.

Claim 29 (Original) The emulsion according to claim 28, wherein said at least one silicone oil is present in a proportion ranging from 25 to 45%.

Claim 30 (Previously Presented) The emulsion according to claim 12, wherein said emulsion further comprises at least one additional silicone compound chosen from poly(C_1-C_{20})alkylsiloxanes, silicone gums, and silicone waxes.

Claim 31 (Original) The emulsion according to claim 30, wherein said silicone gums have a molecular mass ranging from about 200,000 to about 1,000,000, and with a dynamic viscosity of greater than 500,000 mPa.s.

Claim 32 (Previously Presented) The emulsion according to claim 30, wherein said silicone gums are present in an amount up to 5% by weight of active material in the final emulsion.

Claim 33 (Original) The emulsion according to claim 32, wherein said silicone gums are present in an amount up to 1%.

Claim 34 (Original) The emulsion according to claim 30, where said silicone waxes are substituted linear polysiloxanes.

Claim 35 (Original) The emulsion according to claim 34, wherein said substituted linear polysiloxanes are chosen from polyether silicone waxes and alkyldimethicones and alkoxydimethicones containing from 16 to 45 carbon atoms.

Claim 36 (Previously Presented) The emulsion according to claim 30, wherein said silicone waxes are present in a proportion ranging from greater than 0% to 15% by weight of the final emulsion.

Claim 37 (Original) The emulsion according to claim 36, wherein said silicone waxes are present in an amount ranging form 2 to 10%.

Claim 38 (Currently Amended) The emulsion according to claim 12, wherein said emulsion further comprises silicone resins comprising a combination of the units $R_3SiO_{1/2}$, $R_2SiO_{2/2}$, $RSiO_{3/2}$, and $SiO_{4/2}$, wherein R is an alkyl radical.

Claim 39 (Original) The emulsion according to claim 12, wherein said emulsion further comprises at least on non-silicone fatty substance chosen from pasty fatty substances, gums, waxes and oils of plant, mineral, animal and synthetic origin.

Claim 40 (Previously Presented) The emulsion according to claim 12, wherein said fatty phase further comprises at least one oil chosen from oils of plant origin, oils of animal origin, oils of mineral origin, oils of synthetic origin, fluoro oils, and trigylcerides of C_{12}-C_{18} fatty acids in an amount up to 40% by weight relative to the total weight of the fatty phase of the emulsion.

Claim 41 (Original) The emulsion according to claim 12, wherein said fatty phase further comprises lipophilic adjuvants chosen from lipophilic UV screening agents, lipophilic vitamins, antioxidants, fragrances and ceramides.

Claim 42 (Original) The emulsion according to claim 12, wherein said aqueous phase comprises water or a floral water.

Claim 43 (Previously Presented) The emulsion according to claim 12, wherein said aqueous phase comprises from greater than 0% to 14% by weight, relative to the total weight of the aqueous phase, of a lower C_2-C_6 monoalcohol or a polyol.

Claim 44 (Original) The emulsion according to claim 12, wherein said aqueous phase further comprises adjuvants and active principles.

Claim 45 (Previously Presented) The emulsion according to claim 44, wherein said active principles are present in a proportion ranging from 1 to 15% by weight relative to the total weight of the emulsion.

Claim 46 (Original) The emulsion according to claim 12, wherein said aqueous phase is present in an amount ranging from 35 to 80% of the total weight of the composition.

Claim 47 (Original) The emulsion according to claim 12, wherein said emulsion comprises from 30 to 55% by weight of fatty phase and 35 to 75% by weight of aqueous phase.

Claim 48 (Original) The emulsion according to claim 12, wherein said emulsion further comprises at least one co-surfactant or at least one thickener.

Claim 49 (Original) The emulsion according to claim 12, wherein said emulsion further comprises at least one filler.

Claim 50 (Previously Presented) The emulsion according to claim 49, wherein said at least one filler is chosen from talc, mica, silica, kaolin, tetrafluorethylene fluorocarbon polymers, fluorinated ethylene-propylene resins, starch, natural mother-of-pearl, boron nitride, microspheres, microsponges, polyethylene powders, nylon powders, microbeads of silicone resin and silica microspheres.

Claim 51 (Previously Presented) The emulsion according to claim 49, wherein said at least one filler is present in an amount ranging from greater than 0% to 20% by weight relative to the total weight of the emulsion.

Claim 52 (Previously Presented) The emulsion according to claim 51, wherein said at least one filler is present in an amount ranging from greater than 0% to 10%.

Claim 53 (Original) The emulsion according to claim 50, wherein said at least one filler has an average particle size of 15 microns or less.

Claim 54 (Original) The emulsion according to claim 50, wherein said at least one filler is non spherical.

Claim 55 (Original) The emulsion according to claim 49, wherein the weight ratio of said at least one filler to said at least one silicone oil, in the composition applied on the skin and after evaporation of any volatile oils, is from 30:70 to 50:50.

Claim 56 (Previously Presented) The emulsion according to claim 49, wherein n_1 represents the average refractive index of the totality of said at least one filler and n_2 represents the average refractive index of the totality of said at least one silicone oil, then:

$0<|n_1 - n_2|\leq 0.3$.

Claim 57 (Original) The emulsion according to claim 56, wherein

$0<| n_1-n_2 |\leq 0.15$.

Claim 58 (Original) The emulsion according to claim 12, wherein said emulsion further comprises a film-forming compound.

Claim 59 (Original) The emulsion according to claim 12, wherein said emulsion further comprises a cosmetically, pharmaceutically or hygienically acceptable medium.

Claim 60 (Previously Presented) The emulsion according to claim 12, wherein said emulsion further comprises additives present in a proportion ranging from greater than 0 to 10% by weight.

Claim 61 (Canceled).

Claim 62 (Original) A composition for cosmetic, dermatological, pharmaceutical or hygiene use, wherein said composition comprises an emulsion according to claim 12.

Claim 63 (Previously Presented) The composition according to claim 62, wherein said composition is in the form of a care product for the body and/or the face and/or the scalp, or a make-up product.

Claim 64 (Canceled).

Claim 65 (Previously Presented) The composition according to claim 62, wherein said composition is in the form of a fluid emulsion.

Claim 66 (Previously Presented) A process for the non-therapeutic treatment of the skin and/or keratin fibres, comprising applying an effective amount of an emulsion according to claim 12 and/or a composition containing an emulsion according to claim 12 to said skin and/or to said keratin fibres.

Claim 67 (Previously Presented) The emulsion according to claim 30, wherein said poly(C_1-C_{20})alkylsiloxanes are chosen from phenylsilicone oils.

Claim 68 (Previously Presented) The emulsion according to claim 16, wherein said at least one silicone is a polydimethylsiloxane.

Claim 69 (Previously Presented) The composition according to claim 63, wherein said makeup product is in the form of a foundation, a blusher, and eyeshadow, an eyeliner, a mascara or a lipstick.
